## Microfilm Reader/Scanner Policy

**Policy Statement:** The Lancaster County Historical Society is committed to providing the most convenient and efficient access to information practical. As such, we provide a digital microfilm reader/scanner for patron use in accessing our extensive microfilm collections. Patrons are welcome to print scanned images (at .25/page), but in order to protect the security of our local network and historical society files, we cannot at this time allow patrons to use personal USB/flash/thumb drives to download or save images from the microfilm scanner. We are currently pursuing options that *will* allow patrons to use these storage devices while maintaining our network security.
